Task 1: Get data from Stack Exchange

1. **For finding the lower bound value in "ViewCount" that accommodates the 200,000 records**
   select count(*) from posts where posts.ViewCount > 41322

2. **For top 25%**
   select top 50000 * from posts where posts.ViewCount > 41322 order by posts.ViewCount DESC

3. **For next 25%**
   select top 50000 * from posts where posts.ViewCount <= 127402 order by posts.ViewCount DESC

4. **For next 25%**
   select top 50000 * from posts where posts.ViewCount <= 74596 order by posts.ViewCount DESC

5. **For next 25%**
   select top 50000 * from posts where posts.ViewCount <= 53211 order by posts.ViewCount DESC

6. **For the additional 15 records in order to complete the 200,000 records count, once the duplicate records are removed during the data cleaning process**
   select top 50000 * from posts where posts.ViewCount >= 453209 and posts.ViewCount <= 41325 order by posts.ViewCount DESC
